ANKÜNDIGUNG.

Durch die Veröffentlichung der Ergebnisse seiner langjährigen Studien über die Alterthümer des frühen Mittelalters in Ungarn hat der Verfasser die deutsche Literatur um ein grundlegendes Werk bereichert, durch welches ein reiches, vollkommen authentisches Material aus einem bisher fast ganz unbekannten Gebiete zahlreichen dafür interessirten Kreisen zugänglich gemacht wird.

Die in Ungarn wie in keinem anderen Lande so mannigfaltig und in immer wachsender Fülle zu Tage tretende reiche und seltene Ausbeute der aus dem vierten bis elften Jahrhundert stammenden Kunstschätze und Alterthumsfunde, deren Originale in zahlreichen ungarischen und ausserungarischen Museen zerstreut sind und deren Vorhandensein zum grossen Theil nur in der ungarischen Fachliteratur bekannt geworden ist, wird in dem vorliegenden dreibändigen Werke zum ersten Mal vereinigt und in übersichtlicher Darstellung der allgemeinen wissenschaftlichen Verwerthung zugeführt.

Dies geschieht durch die ins Einzelne gehende, auf eigenem Augenschein beruhende Beschreibung sämmtlicher einschlägiger Funde und Ausgrabungsergebnisse, in Begleitung von Abbildungen, welche zumeist unter persönlicher Aufsicht des Verfassers angefertigt wurden und von Seite der zuständigen amtlichen Stellen für diese Ausgabe überlassen worden sind.

Ein voller Band ist der Untersuchung der Objecte vom Standpunkte ihrer einstigen Bestimmung gewidmet, und in ihm kommt auch die Ornamentik sowie die Frage der Chronologie zu ihrem Rechte.

Den nichtungarischen Archäologen und Kunsthistorikern, welche bestrebt sind, von verschiedensten Richtungen aus das Dunkel, das noch über der Cultur des frühen Mittelalters liegt, aufzuklären, bringt demnach dieses Werk reichliches und werthvolles Material, dessen sich die gelehrte Erörterung voraussichtlich sogleich in eingehendster Weise bemächtigen wird; weil in dieser Vereinigung von Objecten sowohl die Jahrhunderte der absterbenden Antike als auch die Epoche der neuen Stylbildungen reichlich vertreten sind, was aus der centralen Lage Ungarns, das gleichsam Sammelstelle für die Hinterlassenschaft der verschiedensten Völker und Culturen war, leicht begreiflich ist. Dieser Vielfältigkeit von Erscheinungen verdankt der dem Werke beigegebene Bilderatlas seine reiche Abwechslung.

Ausser den germanischen Grabfeldern und Schatzfunden, welche für deutsche Forscher besonderes Interesse haben, sind die Reihen „sarmatischer" Grabfelder hervorzuheben, von welchen wir bis jetzt nur in Ungarn eine grössere Anzahl kennen, und ganz für sich in der Fachlitteratur steht die Hinterlassenschaft der ungarischen Heidenzeit, deren merkwürdige Stylistik auf spätes Fortleben sassanidischen und verwandten orientalischen Geschmacks zurückzuführen sein wird und berufen ist, der auf der wissenschaftlichen Tagesordnung stehenden Erörterung über byzantinische und orientalische Kunst nützliche Behelfe zu bieten.

So haben denn sowohl diejenigen ein Interesse an diesem Werke, die sich für den klassischen Süden und den germanischen Culturkreis interessiren, als auch diejenigen, welche ihre Aufmerksamkeit den Culturen des näheren und mittelasiatischen Orients widmen.

Braunschweig, im April 1905.
